

Bridge the Gap from Professional to Streaming Video

The Osprey-540 Delivers Power to the Professional!

Optional Rackmount Breakout panel

Introducing the new Osprey-540, Osprey's most advanced capture card optimized for streaming yet. Offering a vast array of input support, this powerful new card bridges the gap between professional video to streaming.

Flexibility

Whether you are capturing from a Digital BetaCam, DV camcorder, DVD player or VCR, the Osprey-540 offers over 25 unique capture scenarios. This card is designed to accommodate your workflow.

Reliability

The cornerstone found in all Osprey Video products and is recognized throughout the industry. The Osprey-540 is no exception supporting Windows NT, 2000 and XP.

Quality

An Osprey Video tradition that the Osprey-540 does not ignore. Blending new digital input support for maximum input quality with enhanced a/v sync for all inputs, the Osprey-540 goes a step beyond all other capture cards available.

The Osprey-540 features:

- SDI audio/video input
- Hardware DV decoding
- Closed captioning over SDI and analog inputs
- Real time audio/video monitoring
- Enhanced audio/video synchronization
- Real time streaming from all inputs to Windows Media, RealMedia, QuickTime, and MPEG-4
- De-interlacing filter
- Compatible with Osprey Digital SimulStream

Bridge the gap between professional video and video streaming with the Osprey-540!
